DETAILED ACTION

This office action is in response to the amendment filed on March 4, 2003.

Claims 1-43 are currently pending in this application.

Applicant amended the pending claims 1-30 to recite "a method of inhibiting..." and added new claims 31-43 that are also drawn to methods. In view of the change of scope of the claims, the following restriction is deemed necessary.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 (in part), 4-6, 8-13, 15-23 and 30-40, drawn to a method of inhibiting a hedgehog pathway in a normal cell using a compound that causes a decrease in *gli* transcription, classified in class 514, subclass various.
- II. Claims 1-3 (in part), 7, 8-10, 14 and 30-40, drawn to a method of inhibiting a hedgehog pathway in a normal cell using a compound that binds to *patched*, classified in class 514, subclass various.
- III. Claims 1-3 (in part), 24-29 and 30-40, drawn to a method of inhibiting a hedgehog pathway in a normal cell using a compound that increases PKA activity, classified in class 514, subclass various.
- IV. Claim 41, drawn to a method of inhibiting angiogenesis, classified in class 514, subclass various.

Art Unit: 1624

- V. Claim 42, drawn to a method of controlling hair growth, classified in class 514, subclass various.
- VI. Claim 43, drawn to a method of inhibiting a hedgehog pathway in a cell having a hedgehog gain-of function phenotype, classified in class 514, subclass various.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions each of the method of use requires a different characteristic or activity or effect of the compound and therefore, the methods are distinguished by the mode of operation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1624

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
